

THANK YOU FOR DOWNLOADING! SEE YOU IN THE VERSE

Thank you for downloading my icon pack, I really hope you like them.

It contains most of things you need, but if you didn't find the key you need, please let me know via:

<https://robertsspaceindustries.com/community/citizen-spotlight/11967-Star-Citizen-Icons-For-Stream-Deck>

or look up Stream Deck on **reddit** via **r/StarCitizen**

INSTRUCTIONS:

Install the "Star Citizen Play Profile" by going to the Stream Deck program and press the "Setting icon" on the top right of the profile editor.

It opens a preference window, select to "Profiles" tab and at the bottom you'll see a "v icon", click that and you can import the Profile.

It should all be working right away, all keys are already bind to the "Advanced keyboard layout" in Star Citizen.

Enjoy!, for questions please follow the link above :)
